

Plates of simple increment examples
with modulo.

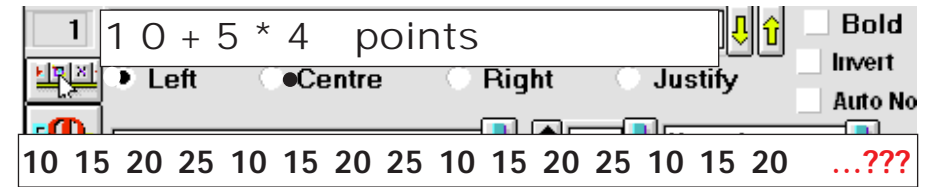

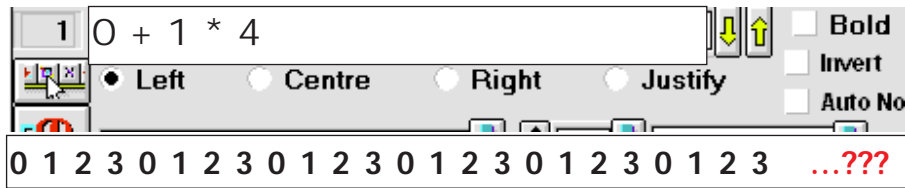

You start at the initial value (2 here)
every 3 exposures in the example on the left
and every 4 exposures in the example on the right.

*** Modulo**

Automatic numbering - Modulo

Plates of examples of more complex increments with modulo.
In the example on the left, we start at the initial value 0 and every 4 exposures
Then in the example on the right, we begin again at the initial value 10 and every 4 exposures.
